COURSE CONTENT

- General introduction;
- Business Continuity principles, vocabulary and ISO 22301 requirements;
- Document review and audit planning;
- Process auditing and audit skills;
- Writing Nonconformity reports and audit reporting;
- Audit follow up.

Objective

This course provides students with the knowledge and skills required to perform an internal audit of part of a BCMS based on ISO 22301 (or equivalent) and report on the effective implementation and maintenance of the management system in accordance with ISO 19011.

The course meets the training requirements for internal auditor certification set by the Chartered Quality Institute and International Register of Certificated Auditors **(CQI IRCA, www.quality.org)** of the United Kingdom.

PREREQUISITE

Prior knowledge on

- Management systems including the PDCA (Plan, Do, Check, Act) cycle and the core elements of a management system
- Business Continuity principles/concepts such as , conducting of business impact analysis and risk assessment, the development of BC strategies and solutions and the implementation of BC plans and procedures
- ISO 22301 and the commonly used Food Safety terms and definitions

The ALAUDA WAY

By engaging in tutor-led discussions, exercises, workshops, and role-plays, students will acquire comprehensive knowledge and develop essential skills in the field of auditing. This will enable them to become competent Energy Management System professionals, fully equipped to navigate the entire auditing process.

WHO SHOULD ATTEND

- The members and supporting personnel of the Business Continuity management team.
- Personnel involved in operation, engineering, and purchasing who wish to gain maximum benefit from the implementation of the Business Continuity Management System; and
- Any other personnel who wish to advance their career in management systems, regardless of their discipline
